VKS	Vanuatu Kaljoral Senta/Vanuatu Cultural Centre

## 1.0 Introduction

The first priority civil works activity under the Millennium Challenge Account (MCA) Vanuatu Transport Infrastructure Program is the MCA02 Subproject, which involves the upgrade of 97 Km of the Efate Ring Road to bitumen seal and associated road rehabilitation works. This report provides an abbreviated Resettlement Action Plan (RAP) for the construction works associated with the 5km point (Snake Hill) to the 97 km (end of the seal at Japanese Road) Point excluding the 23km Point to the 28km Point section of the Subproject. The Meten Hill (23km to 28km) RAP No.5 was identified as a priority section of the road for the test pavement so a RAP was prepared and approved previously. The RAP approach that is being taken for the whole of the Efate Ring Road Subproject is consistent for all sections of the road in terms of generic Goodwill Entitlement (Compensation) Table, and Grievance Redress Procedures.

The Efate Ring Road Subproject involves the upgrade of an existing road, for the most part within the alignment of a Government acquired Right of Way. The Ring Road has the support of Vaturisu Council Chiefs from Efate and those communities living adjacent to the road. There will be no displacement or relocation of people or households. The design of the upgrade will avoid, remedy or mitigate any potential adverse affects. All assessments indicate that the only negative economic or physical displacement impacts from the Efate Ring Road upgrade will be very minor and readily mitigated. Most impacts relate to trees and fences/ hedges within or adjacent to the Right of Way, or temporary loss of land used for construction assembly, storage or site works. There may be some temporary loss of income related to impact of construction on access to properties. There may also be small-scale permanent loss of land where the existing road has encroached on leased land and design solutions are restricted.

In recognition that minor and temporary disruption of people's livelihoods may occur, MCA-Vanuatu wishes to approach these as opportunities for building goodwill and development opportunities which contribute to the economic and social well-being of affected people. The concept of compensation has a difficult history in Vanuatu. In consultation with stakeholders, the Program has chosen to use the term "Goodwill Entitlement" to stress a development-oriented and positive approach, in keeping with the overall Program desire to improve people's lives.

## 1.1 Purpose of the RAP

The purposes of this RAP are to;

- Identify and measure the impact of the Subproject on the people who live and work adjacent to the Efate Ring Road.
- Develop mitigation measures including goodwill entitlements, for landowners and leaseholders affected by temporary or permanent relocation of structures, crops, fences or loss of income, in a way that is appropriate and consistent.
- Identify the responsibilities of the various parties that are to implement the plan, including providing information and guidance to Downer EDI Works Ltd (the Design and Build Contractor) on their responsibilities under the RAP, which will be reflected within their Environmental Management and Implementation Plan, and to Queensland Consulting Project Partners (the Engineer) on their monitoring and approval responsibilities.
- Facilitate MCA-Vanuatu and MCC approvals to ensure compliance of Compact obligations governing environmental, resettlement and social sustainability. The RAPs are “conditions precedent” to the distribution of construction funds as mandated under the Vanuatu Compact and Disbursement Agreement.

The consultations for the RAP provide additional opportunities for affected households and other stakeholders to be consulted on the proposed construction works and to provide meaningful input into the design of the overall program.

This RAP has been developed using reports of site visits and consultations prepared by Maunsell Ltd and the Vanuatu Kaljoral Senta/ Vanuatu Cultural Centre (VKS). MCA-Vanuatu and its ESA Consultant used these reports to work with its implementing entities such as the Department of Lands and the Public Works Department’s Engineering Support Unit (ESU), and other Government agencies such as the Department of Agriculture and the SHEFA Provincial Council. The Efate Vaturisu Council of Chiefs has played a significant role through its designated spokesperson and MCA consultant Chief Mormor. Joint field trips with MCA, MCC, DLSR, ESA Consultant, Chief Mormor and Downer EDI Works also contributed to the process. A special, whole of government team was set up to investigate and cost options for the Tanoliu village section.

## 1.2 Summary of Key Issues of this RAP

The resettlement issues which have been identified and for which mitigation measures are provided are:

- An agreed road realignment at Tanoliu to protect the road from coastal processes, improve access to the foreshore for the community and to accommodate the tourism and market opportunities and plans in Tanoliu village. Whilst this realignment involves relocation of small enterprises and fences, it has been agreed as the best solution for national, provincial, and industry development, and has the support of the village and affected persons.
- A currently unapproved road realignment proposal, comprising a partially constructed, private realignment at Undine Bay related to a marina development under construction will need to be carefully monitored for compliance with GoV and MCC requirements. Should this not be achieved within timelines and conditions, the Contractors will utilize the existing road alignment.
- Access to tourism operations including Lelepa Island Tours, Sail-Away Cruises, Gideon's Landing, Tanoliu market stalls, Skydeck, Beachcomber, Sara Beach, Blue Hole and Nasinu Canoe Tours is to be protected as far as possible to minimize loss of income. In particular full information on construction programme and possible delays is to be provided to businesses.
- The Lelepa Island community landing is to be preserved both during design and construction to accommodate ongoing access.
- Where sections of the road are close to the coast near Onesua, widening on the landward side to maintain coastal vegetation as protection against erosion may mean additional vegetation (low value species) needs to be removed adjacent to the Onesua School and Presbyterian College.
- Banana plantations at Malafau Village, Tssariki and Epau Community located within the RoW will need replanting in alternative locations. Alternative planting areas to be cleared by PWD or contractor depending on what is appropriate.
- Commercial Coconut plantations at Undine Bay within RoW will need to be removed or relocated.
- Drainage and flooding problems on the road between Epule and Epau, above Ekipe Village may require additional drainage work including the construction of outflows on to properties, with potential additional resettlement issues.
- Some relocation of fences, signs and temporary roadside stalls, which are located within the road reserve will need relocation.

It is also important to note the following potential environmental and social issues related to this section of Road:

- Additional engineering works at Dry Creek to protect the road from coastal erosion in particular storm surges.

- Traffic Management, including safety issues on different sections where the works are steep or the road narrow and winding.
- Drainage design on the Epule to Epau road to consider the location of Ekipe village below the road.
- Additional silt management measures to be in place during construction for all sections of the road close to the foreshore or fresh water resources.
- There are a number of Nabanga trees close to the road that will require protection during construction.

The communities located adjacent to the road on this section of the Ring Road include Kakola community at the top of Snake Hill, Mangaliliu Village, Tanoliu Village, Havannah Community, Malafau Community, Siviri Village, Saama Village, Emua Village, Lakanosua Community, Poangaisu Village, Takara Village, Epule Village, Ekipe Village, Epau Village, Pangpang Village and Eton Village. These communities are concentrated on the north-western to north eastern side of the island, with only Mangaliliu and Tanoliu Village on the west coast and Epule, Epau, Ekipe, Pangpang and Eton on the east coast. For the purposes of the STI/HIV awareness some communities will be invited to nearby villages to attend the awareness.

### **1.3 The Vanuatu Legal and Policy Framework**

A description and analysis of the national policy and legislation framework that has implications for the RAP process was undertaken for the first RAP for the Subproject - Epule Bridge and Epau Creek Crossing. As the legal and institutional framework for RAPs are based on national laws governing land reform, acquisition and leases for all of Vanuatu, this framework and analysis is being applied for all RAPs being prepared for the Subproject. This RAP has been prepared in accordance with the legislation and policy as described in the RAP for Epule Bridge and Epau Creek Crossing, which is available for the public to review from the MCA Office in Port Vila and on the MCA Website. The Goodwill Entitlements Table used in the RAP (attached in Annex I) has been prepared in accordance with the Agricultural Compensation Policy.

## **2.0 Approach and Methodology**

This report is built upon the following work:

- A Preliminary Environmental and Social Assessment (PESA) January 2006 prepared by Parsons Brinckerhoff as part of the MCC's technical, financial and economic assessment of the MCA-Vanuatu program comprising 11 Subprojects.
- A preliminary Reconnaissance Survey and Scoping Report prepared by Maunsell Limited in 2008.
- A preliminary Environmental and Social Assessment Report including Environmental Management Plans for the Efate Ring Road Subproject MCA02 prepared by Maunsell Limited in 2008.
- A preliminary Resettlement Framework for the Vanuatu Transport Infrastructure Program, prepared by Maunsell Limited in 2008.

- Assessments and comparisons of surveys and records of land use and road right of way from the Surveyor-General's Office, the Lands Lease Records Office, and recent survey undertaken by sub-contractors to Downer EDI Works.
- RAP investigations on site on the 18<sup>th</sup> September, 26 September and 23 October 2008.
- Consultation meeting with Villages at Gideons Landing on the 17<sup>th</sup> September, Emua on 18<sup>th</sup> September 2008, Epau Village on the 25<sup>th</sup> September and 3<sup>rd</sup> November and Eton Village on the 3<sup>rd</sup> of October.
- Additional research and consultations on the Tanoliu village section, culminating in a presentation to the MCA Steering Committee and a policy and budget-based decision to select the preferred option.
- Consultation with Leaseholders on the 29<sup>th</sup> of October 2008.
- Consultation with all property owners (owning property adjacent to the road) during a 2-week exercise to gain agreement to the GET from the 4<sup>th</sup> of November to the 14<sup>th</sup> of November.

These reports and surveys form an important backdrop to this report. They are available from the MCA Office.

Under the Compact, the Transport Infrastructure Program must respect and work within the Government's regulatory and customary approaches to resettlement and MCC's environmental guidelines. MCA has sought practical guidance from the agencies and stakeholders who apply the Vanuatu framework to ensure recommendations and developments such as the 2007 National Lands Summit could be considered. The involvement and support of the Ministry of Lands, the SHEFA Provincial Planning Office, and the Vaturisu Council of Chiefs of Efate is ensuring that Vanuatu requirements are met. Where the local approach provides lesser safeguards than those offered under MCC's Guidance and the World Bank Operational Policy (OP4:12) and annexes, the latter will prevail. Under the MCA Compact, the Government of Vanuatu is responsible for any compensation or positive entitlements. MCC funds can not be used for these purposes.

World Bank OP4:12 defines resettlement as including the involuntary taking of land resulting in:

- Relocation or loss of shelter; loss of assets or access to assets; or loss of income sources or means of livelihood, whether or not the affected persons must move to another location; or
- The involuntary restriction of access to legally designated parks and protected areas resulting in adverse impacts on livelihoods.

MCC guidance requires that loss of assets such as structures, trees, and crops, whether temporary or permanent, be considered as economic displacement. These guidelines have been shared with local authorities and stakeholders.

The main point of difference between Vanuatu legislation and WB OP4:12 is that Government compensation for permanent loss of land is based on the value of the loss of use rather than market value replacement for the loss of the land. The need for "fairer

dealings” in compensating land owners was recognized as a major issue in the 2007 National Lands Summit. This has been taken into account in the Goodwill Entitlements Table for the Vanuatu Transport Infrastructure Program (refer Annex I).

## **2.1 Goodwill Entitlements Table**

The Goodwill Entitlements Table (GET) reproduced in Annex I, has been developed as a whole of Government approach, involving responsible departments such as Department of Lands and Department of Agriculture, and the SHEFA Provincial Government and the Vaturisu Council of Chiefs of Efate. The GET reflects the limited resettlement situations expected to be encountered on the Efate Ring Road. The intent is to ensure that no-one is worse off as a result of the works, and where possible, that people benefit from the road.

Goodwill Entitlements will be in-kind allocations or cash payments according to the table in Annex I. The same options will be offered consistently to all affected parties throughout the life of the Compact. Agreed entitlements will be made as soon as possible and generally prior to the commencement of civil works in the area.

These Goodwill Entitlement options apply to the Vanuatu Transport Infrastructure Program and are not intended to establish a precedent for other Government, donor, or private-funded civil works programs. There is currently a gap in Government policy to address resettlement and relocation issues resulting from Government works including infrastructure projects. It is envisaged that an evaluation of this resettlement programme implemented by MCA will provide a basis for the government to adopt this approach or to formalize a similar approach.

For this RAP the GET was expanded to provide additional entitlements for those communities with commercial plantations of bananas and coconuts within the Right of Way. The previous RAP work for other sections of the Efate Ring Road had not required an entitlement for these purposes, however plantations at Malafau, Siviri, Emua and Epau required a threshold of 5 or more crop of one species to identify plantings that are commercial and related to livelihoods of families. The clearing of land by PWD/DB Contractor to accommodate replanting of seedlings will allow communities to harvest crop within the RoW while developing a new more appropriate area for commercial gardens.

## **2.2 RAP Information**

The RAP:

- Lists all assets likely to be impacted by the road works.
- Describes and values each asset, and the nature of the impact (for example, loss of crop, structure, or tree; loss of income, loss of access to services or social networks; and whether the impact is temporary or permanent).
- Provides the names of the affected owners, individuals, families, and communities.

- Identifies which compensation options (from the Goodwill Entitlement Table) were agreed, and provides dates and signatures or evidence of the compensation being agreed and made.
- To assist in the development of the EMIP and to ensure that particular agreements made with landowners are reflected in the EMIP any ES or EMP issues related to resettlement are identified. This also guides the DB Contractor in the final design and during construction.

Those people or communities that are considered to be potentially adversely affected by the proposed works have been identified by MCA teams and have been consulted. These people are listed on the RAP inventory. To be eligible, a person or community:

- Must have land, home, structure, trees or crops which are affected by the road works, whether they have formal title or ownership rights or not.
- May be likely to lose permanent or temporary access to resources as a result of the road works.

The process allows for new affected persons to be identified and consulted should changes to the proposed road works occur during design or construction.

It should be noted that all the villages within these sections of the Ring Road (Mangaliliu, Tanoliu, Saama, Emua, Takara, Poangaisu, Epule, Epau, Pangpang and Eton Villages), tourist operations and leaseholders are aware, as a result of the consultations, that the building contractor is required to work in accordance with Environmental Management Implementation Plans. More significant environmental and social impacts for this section of road are:

- Engineering solutions to control silt and runoff during the construction of the road adjacent to water ways including the foreshore.
- Traffic Management, including safety, during construction of the road.
- Awareness-raising for the contractors and the village to avoid the spread of communicable diseases including STIs, HIV/AIDS.
- Proper disposal of waste.
- Management of health and safety.

The villages are also aware that the Engineers and the MCA team will undertake inspections to ensure compliance with these requirements.

The STIs, HIV/AIDS awareness programme to be implemented by Wan Smol Bag for the villages on this section of Road is currently being finalized by the Contractor. The programme will undertake the Awareness in the following villages;

- Emua and Paongisu
- Tanoliu (will have a date by next Tuesday)
- Mangaililiu
- Onesua
- Epule (if not inc with Onesua)
- Epau
- Eton
- Rentabao

### **2.3 RAP and the Relocation of Public Utilities**

There are no power poles in the sections of road being addressed in this RAP. There are TVL cables located under the road at different sections, in particularly from the north eastern point of the road to Eton Village. The communities have provided information about the location of these cables and the design build contractors are liaising with TVL to verify locations and prevent damage to the cables during construction.

Community owned water supply infrastructure is located at different points under the existing road. During RAP consultations the location of known water infrastructure was determined wherever possible and affected persons and the DB contractor were alerted to the need to protect water supplies. However it is anticipated that there may be infrastructure that cannot be easily identified before construction and which must be addressed during construction. The infrastructure should be protected from damage, and the owner of the infrastructure determined and consulted. If required the infrastructure shall be retained within the new road. Should the contractor need to disrupt the supply of water during construction the Contractor must consult with the owner and if necessary a goodwill entitlement appropriate to the duration of the supply disruption should be offered.

### **Inventory of Losses, Affected Persons and Communities, and Agreed Goodwill Entitlements.**

RAP No 6: From 5km to 97km (end of the seal at Japanese Road) measured from bottom of Klems Hill (0km point) and excluding 23 km to 28km Section at Meten Hill.

The losses and relocations in the table below may not be confirmed until final designs are approved. Goodwill Entitlements and agreed solutions will be offered once these impacts are confirmed and prior to the commencement of construction. All attempts by the DB Contractor will be made to retain structures including fences and preserve vegetation where possible. The location of the structures and vegetation in this table is based on joint site investigations undertaken by MCA, MCC, ESA Contractors and DLSR and are located according to the nearest kilometer mark.

#### **Special Notes**

- The variation in odometers in different vehicles used for this inventory of losses has resulted in discrepancies in the chainage with different sections of the road of up to 300m. The chainage should be used as a guide to measure against distances between permanent structures or natural markers noted in the table.
- The section through the village of Epau was not undertaken using the odometer as the community provided input into the design of the proposed road as it passes through Epau village. To accommodate this, the section was walked by the ES team and the community. It is considered the odometer does not provide an accurate enough measurement for this section as there are multiple crops, structures and vegetation occurring within the RoW.
- All crop trees (fruit and nut), Nabanga or hardwood trees as listed in the inventory of losses table that require trimming will be protected from being destroyed where possible. However, should a tree be destroyed during construction, the owner will be entitled to replacement seedlings to be provided by the Department of Agriculture.
- Where there may be realignment due to the proximity of the existing alignment to the coast, additional RAP work may be required for widening on the landward side. This will be undertaken as required.
- Where there is no entitlement, signatures may not have been obtained, but landowners names have been entered to provide assistance if any issues occur during construction.
- Signatures of property owners currently absent from the country or that have been difficult to locate are still being obtained.
- The La Mine community which lives above the road between Epau and Pangpang have communally-owned gardens close to the road for approximately 1.5km. The chiefs and assistant chiefs have signed on behalf of the community.

- It was difficult to approximate the number of Banana trees that will require removal in some plantation areas due to dense surrounding vegetation. It is recommended that replacement seedlings should be provided once the quantity affected can be confirmed. It is also recommended that the contractor keep a schedule of crop trees removed.

<b>Location and Area Reference</b>	<b>Description of Asset and Valuation and Impact of Loss</b>	<b>Names(s) and Status of Owner(s)</b>	<b>Agreed Solutions and Goodwill Entitlements</b>	<b>ES Issues to check in EMP</b>	<b>Name of Signatory</b>
<b>5.6 – 6.1km</b>	Fence on RHS of road to be relocated to outside RoW.	Sam Kaua	The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused.	NIL	Sam Kaua
<b>6.4km</b>	Entrance to Kakola station on RHS may need to be regarded.	Sam Kaua	Landowner agreement with the contractor	Ensure access is maintained during construction.	N/A
<b>6.7km</b>	One young and two mature coconut trees on northern side of road to be removed and 1 Natapoa to be removed.  Three coconuts & one natapoa tree on RHS to be removed	Hugo Dini  Philip Kalmor	The Department of Agriculture will provide tree seedlings.	NIL	Hugo Dini  Philip Kalmor
<b>6.8km – 7.4km</b>	Fence on RHS to be removed	Kaltouk Kalmor	The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused.	NIL	Kaltouk Kalmor
<b>6.9km</b>	Digicel tower on northern side of road, cable under road to be protected during construction.	Digicel	Protect cable during construction no entitlement	Protect underground infrastructure.	N/A
<b>6.7 – 6.9km</b>	10m of fence on western side of road to be relocated (LHS), natapoa to be trimmed.	Joseph Sano	The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused. The Department of	NIL	Joseph Sano

			Agriculture will provide tree seedlings.		
<b>7.8km</b>	Junction to Mangaliliu.  Coconut trees on corner RHS of road to be removed.	Chief Tungoliuman	No entitlement.  The Department of Agriculture will provide tree seedlings.	Access to Mangaliliu Village to be maintained during construction	Chief Tungoliuman
<b>7.8km</b>	Fence on western RHS side of road from culvert to 8.1km	Chief Tungoliuman	The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused.	NIL	Chief Tungoliuman
<b>8.1km-8.5km</b>	Five pandanus trees, three banana trees, one natapoa tree to be removed on western side of road (LHS). Fence should also be relocated.	Obed Turtabang	The Department of Agriculture will provide tree seedlings. The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused.	NIL	Obed Turtabang
<b>6.7km-8.7km</b>	On western LHS side of road garden within RoW requires removal of 2 guava trees, 3 coconuts, 3 navele trees, 12 banana trees, 3 nakavika trees, possible fence relocation.	Peter Taurakoto (ombudsman)	The Department of Agriculture will provide tree seedlings	NIL	Son Michel Taurakoto signed on behalf
<b>9.1km-9.4km</b>	Culvert and nakatambol to be removed from eastern side (LHS) as affected by culvert works. Young coconut relocated from LHS. Fence to be relocated.	Mananu Kalsau	The Department of Agriculture will provide tree seedlings. The building contractor (with PWD assistance) may assist movement and replacement of the fence and make good any damage caused	If culvert works require further resettlement additional agreements will be required.	Mananu Kalsau
<b>9.4km – 9.6km</b>	Nabanga tree & 2 young coconuts to be relocated from RHS (Ngerea)	Boikiki Kalkoa	The Department of Agriculture will provide tree seedlings.	NIL	Boikiki Kalkoa
<b>9.7km</b>	Large nabanga to be trimmed (low branches only).	Saliak Lore	No entitlement as not crop. The Department of Agriculture will	NIL	Saliak Lore

	1 coconut tree on western side of road to be removed (RHS)		provide tree seedlings.		
<b>10.5km</b>	Nabanga tree on western side of road (RHS) to be lightly trimmed. coconut on western side (RHS) to be removed (Maua Hill)	Leonard Kaltonga	The Department of Agriculture will provide tree seedlings	NIL	Leonard Kaltonga

## Appendix I: Goodwill Entitlements Table (GET!) for MCA-Vanuatu Compact Roads, October 2008

Type of Affected Asset	Village/ Chiefs -Arranged Assistance	MCA -Arranged Entitlement may be selected and agreed from one or more of these options
Cash crop or fruit or custom trees or ornamental plants where it is clear that the crop has been planted by community or landowners (not self seeded e.g. Pawpaw)	<ul style="list-style-type: none"> <li>• Owner(s) may retain crops and/or wood.</li> <li>• Village/ Chiefs provide alternative land for re-planting, assist with relocating plants from within the RoW if feasible to other areas outside the RoW, re-planting of new crops, and provide initial access to other crop or fruit until trees are bearing, if required.</li> <li>• Where plantations within the RoW have many different owners the Chiefs will distribute the entitlements accordingly.</li> </ul>	<ul style="list-style-type: none"> <li>• Free removal, once agreed.</li> <li>• Replacement plants or seedlings provided with the assistance of the Department of Agriculture.</li> <li>• Where more than 5 crops planted for commercial purposes are located within the RoW are to be removed, land in a location agreed to by the landowner and easily accessible to the road, at least equivalent to the space lost by the clearing of the RoW should be cleared by PWD/Contractor for re-planting.</li> <li>• Information of timing of proposed clearing of vegetation within the RoW to communities to allow harvest and replanting planning within communities. Advice available from Department of Agriculture to communities on this if necessary.</li> </ul>
Hedges, fences or cattle stops	<ul style="list-style-type: none"> <li>• Owner(s) may retain materials.</li> <li>• Village/Chiefs provide alternative land for hedge or fence if required, and provide assistance with erection.</li> <li>• Owners of cattle stops to identify if required to retain cattle stops within RoW.</li> </ul>	<ul style="list-style-type: none"> <li>• Free removal, once agreed.</li> <li>• Replacement or relocated plants or materials provided with assistance to replace hedge or fence to same quality and condition or to PWD standards.</li> <li>• Replacement of cattle stops if owners require cattle stop to be retained and if approved by appropriate authority.</li> </ul>
Temporary loss of community or custom land for construction assembly, storage or site works for period of less than twelve weeks, including access to water and toilets, but no accommodation.	<ul style="list-style-type: none"> <li>• Village Chief to assist with selection of workers (if requested by the Contractor) and distribution of unwanted construction materials.</li> <li>• Mamas Association to assist with refreshment services if requested by the Contractor.</li> </ul>	<ul style="list-style-type: none"> <li>• Free clearance and grading of land by the contractor.</li> <li>• Payment for security service if requested by the Contractor to protect site and equipment at the rate of Vatu1000 per 24 hour period.</li> <li>• Employment opportunities with the civil works program at the rate of Vatu1000 per day.</li> <li>• Donation of unwanted materials resulting from the works.</li> <li>• Cash advance and purchase of food and drinks through the Mama's Association as required.</li> <li>• Small items of sporting equipment.</li> <li>• First Aid Kits.</li> <li>• Gift boxes of food OR books OR calico, OR mobile, or other items agreed with the community, depending on size and value</li> </ul>

		of land and length of time of temporary loss of use.
Temporary loss of community, custom, or private land for construction assembly, storage or site works including accommodation for period of more than twelve weeks, including accommodation, power, water, sanitation, fencing.		<ul style="list-style-type: none"> <li>• Building contractor negotiated and funded commercial arrangement based on market value as determined in consultation and agreement with lease holder, custom owner and chief, and using both cash and in-kind assistance, consistent with rates of compensation as determined by the Enforcement Office, Lands Department.</li> </ul>
Temporary loss of income from tourist or other small business activities.		<ul style="list-style-type: none"> <li>• Offer of paid security service to protect site and equipment at the rate of Vatu1000 per 24 hour period.</li> <li>• Employment opportunities with the civil works program at the rate of Vatu1000 per day.</li> <li>• Voucher for small business or similar training.</li> <li>• First Aid Kit</li> </ul>
Temporary structures or stores.	Village/Chiefs provide alternative land if required, and provide assistance with erection.	<ul style="list-style-type: none"> <li>• Assistance with re-location or replacement.</li> <li>• Offer of paid security service to protect site and equipment at the rate of Vatu1000 per 24 hour period.</li> <li>• Employment opportunities with the civil works program at the rate of Vatu1000 per day.</li> <li>• Voucher for small business or similar training.</li> <li>• First Aid Kit</li> </ul>
Permanent loss of land.	Village/Chiefs provide alternative land if appropriate.	<ul style="list-style-type: none"> <li>• Lands Department provides cash compensation from the Government Compensation Fund in line with size of land loss and Department valuations and procedures, with an emphasis on “fair dealings”. MCA will work with Lands to ensure “fair dealings”.</li> </ul>

## **Appendix II: Grievance Redress Procedures**

The GoV already has extensive guidelines for managing grievances associated with land and related assets such as crops. Timely redress of any grievances associated with the MCA civil works is vital to the satisfactory completion of resettlement and to completion of the program on schedule. These procedures are intended to complement the Government systems and to provide options for fast-track resolution of grievances.

Affected persons have the right to file complaints or queries in the event that there are any grievances resulting from loss of assets because of the road constructions. The following procedures should be followed:

- In the first instance, and in respect to Vanuatu ways, affected persons are encouraged to express their grievances and attempt a resolution through their community and Customary processes. Chiefs have agreed to give priority to speedy hearings. Community field workers are also available to assist. The building contractor will, at all times, have a representative whose duty it is to hear and attempt to resolve any grievances. The Vaturisu has agreed to assist. MCA has employed Chief Mormor to assist with the local resolution of grievances.
- Should customary processes not be appropriate or not lead to a resolution within seven days, the aggrieved person should register their grievance with the MCA Environmental and Social Assessment Officer or the Provincial Planning Officer.
- Within five working days, MCA and the Provincial Office will attempt to settle the grievance with additional explanation efforts and some mediation with the aim of settling the dispute amicably. The DB contractor and the FIDIC engineers and PWD's Engineering Support Unit may provide advice. In some cases, chiefs and customary leaders may be asked to assist. In some cases, other Government agencies such as the Department of Lands or the Department of Agriculture may be asked to assist or to manage the grievance under their normal procedures. These agents will ensure that aggrieved persons have access to information about their rights under the Government's systems and these procedures. MCA may also seek participation from its contractors.
- In cases where a resolution is not easily found within the five days, MCA and the Provincial Government may establish a Grievance Committee comprising knowledgeable persons and community leaders, experienced in the subject area and with skills in mediation to assist with the management of the grievance. Mediation meetings will be held with interested persons. Government agents and chiefs have agreed to provide their time for free as part of their contribution to the Compact. There are no charges for the aggrieved person under these steps.
- Aggrieved people remain free to pursue their grievance under existing Government regulations or to open a court case. Normal charges will apply. It is hoped that the mediation processes will provide effective and quick resolutions so that lengthy processes and courts of law become a "last resort" option.

At all stages of these procedures, special efforts will be made to consider the needs of vulnerable people including sole supporting parents, and people with disabilities. Special attention will be paid to the special needs of women and young children.

MCA-Vanuatu will establish a database to document all grievances and track their outcome, and summarize this information on the MCA website and in its regular reports to the MCA Steering Committee, the Council of Ministers, and MCC.

### APPENDIX III – Consultations undertaken for 5km to 97km of the Efate Ring Road.

Note that in these meetings (except for the ES workshop) Bislama was spoken. As a result the ES Consultant may have missed some points in her note taking. Where available notes from other sources were integrated.

Date	Consultation Meeting	Purpose of the Meeting
August 20 2008	MCA-Vanuatu Steering Committee Meeting	The meeting had 3 main agendas: <ul style="list-style-type: none"> <li>• Update of Project Management Unit Activities</li> <li>• Approvals required from the Steering Committee, including RAP, ESA EMP and Consultation Plan.</li> </ul>

## APPENDIX V – Consultation Meeting Notes

### Tanoliu Pre-site visit Consultation Meeting - 9am Friday 29<sup>th</sup> August @ MCC Conference Room

Paul Cox Martin (QCPP)  
Ampatha (ESU)  
Chief Mormor (Vaturisu)  
Pedro Jack Loveman (Dept. of Agriculture and Fisheries)  
Brigette (Cultural Centre)  
Catherine Malosu (MCA)  
Chris Cookson (MCC)  
Mandy Fitchett (ESA Consultant MCA)  
Craig Smart (Downer Edi)  
Phillippe Firiam (ESU-PWD)  
Stanley John (SHEFA Provincial Council)  
Michael Busai (Dept of Agriculture and Fisheries)

#### Summary of Purpose of Meeting;

- Issues identified to be considered in design (or alignment) of the road at Tanoliu.
- Proposed approach to consultation with the community.
- Look at map and discuss location of potential issues and alignment options.

#### Meeting Notes:

- MCA update on the Ring Road to date, progress on the Epule and Epau Bridge, the barge landing and consultations. Proposed dates to start works on the first 5km starting from the top of Klems Hill is 15<sup>th</sup> September. Site clearance for first 5km hope to start end of next week.
- MCA presented the potential issues in Tanoliu to the group and the purpose of the consultation meeting.
- After a discussion on policies, plans, strategies that might affect the design or alignment of the road there were none identified. A list of tourist facilities prepared by the SHEFA province has GPS coordinates of a parking bay/tourist shelter and facilities that was identified by the community has a good location. This will need to be mapped before consultation with community.
- Currently no accurate survey of the existing road and the Right of Way. This needs to be completed to confirm the existing road is within the RoW and location of property boundaries for the RAP.
- Brigette advised that there are no known specific archaeological sites, but rather the whole area is a general archaeological area so objects of archaeological significance may be found during construction, the EMP provides guidance on the procedure.
- That the cost of the design and alignment will ultimately determine what the road looks like, therefore we should assume that the road will remain within the existing alignment with proper procedures followed for archeologically discoveries, provision of level areas for tourist parking, consideration of future facilities (funded outside the contract) and traffic calming measures, (Paul Cox-Martin).

- NTDO reported a current review of their tourism master plan, and the lack of tourism planning for SHEFA, in particular North Efate. Adela identified a need to work with SHEFA on developing a masterplan.
- No studies of the coastal erosion along the Tanoliu stretch were known by the group. Potential to use geotextile products to slow erosion processes down could be accommodated with a contract variation (Paul Cox-Martin). Consultation process could also be used to raise awareness in the community about the coastal erosion that may affect future plans for the village.
- Potential to use by-pass road discussed firstly as an alternative road in the future if other problems such as erosion and encroachment of trees make the current road alignment too difficult to maintain and as a potential bypass during construction. There would be potential issues of resettlement and is considered not necessary during construction. The option of future use of the road could be highlighted with the community.
- There are currently 4 chiefs in the village. Previous consultations held by Brigitte were done individually with 4 meetings. Consultations for the RAP and Village Welkams may also have to be undertaken in this way. A best approach to consultation was discussed and agreed to by the group with Thursday 4<sup>th</sup> September for the joint site visit and village consultation meeting. Catherine to communicate this to Chiefs Friday so announcement can be made in church on Sunday.
- Contractor would like to put some pegs in the ground to measure the road before the joint site visit next Thursday to show the community the proposed width of the road. Chief Mormor to communicate this to the chief's this weekend.
- There may be plant machinery parked overnight adjacent to the road but no day camp is planned at this stage.
- Need to provide options to the community for how to deal with the trees with roots encroaching into the road way. Concrete block or other design engineering solutions should be explored. Provide the community with the option of cutting the trees down.
- Provide community with options for signage and traffic calming measures for their village. Acknowledge however that this is ultimately a cost decision.
- Be aware that there are a number of economic activities taking place along the section of road including tourist stalls, firewood collection and sale, coconut plantation and fishing, (Dept. of Agriculture).
- Ongoing maintenance of road will require labour need to discuss at consultation when community bring up the issue of labour hire during construction.

Actions:

- Prepare survey map with location of tourist facilities as agreed by the community already. (Phillippe)
- Services network maps (Downer/Maunsell)
- Preliminary design of road (Downer/Maunsell)
- Thursday meeting with Community 9am need to communicate ASAP to give enough notice to community (Catherine/Downer)
- Communicate with chiefs re pegs placed in ground on Wednesday 3<sup>rd</sup> September (Chief Mormor)

**Tanolu Village Consultation Meeting 4 September 2008**  
**Summary of Notes Mandy, Chris and Catherine.**

**Hall Meeting**

Issues highlighted by community during open discussion –

- Telephone pipe under road
- During cyclone there is water on the road at high tide. This brings stones and rocks onto the road causing traffic problems.
- Dust is a very big nuisance, especially for stall holders trying to sell food to Tourists.
- Everyone agreed they need a good new road.
- Ex-PWD (Chief ?) suggested moving the road up towards the village approximately 7m from its current location to protect the road from saltwater and for safety. If moved too close to the existing houses then would need to discuss with house-owners individually.
- Would prefer the pavement (pedestrian) along the water side (between stalls and road)
- Community concerned about safety and are interested in traffic calming measures.

**Onsite**

- Marine Reserve owned by one family, representative from family spoken to is Donald James (environmentalist). He advised that the marine reserve is just the reef from the bridge to the edge of the reef on the eastern point of the village (bottle museum), out to the edge of the reef. There is no fishing on the reef and Donald takes tourists snorkeling on the reef. Donald agreed to any coastal protection works within the foreshore as it would prevent the further siltation of the reef. He understands it will be cloudy on the reef during works but in the long run is a better approach.
- All village agreed blue pegs were useful.
- Bridge at western edge of town is point 18.1km. Bridge is good condition does not need replacement or repair.
- Suggestion by community to shift the bridge so that it would align to a new alignment of the road further inland.
- Currently loose rocks stacked on foreshore to prevent erosion. Further gabion work is required including use of possible geotextiles, (Paul Cox-Martin)
- On the southern side of road a rare hardwood Nakimau must be protected if possible.
- Potential tourist parking area behind the Nakimau tree and in front of the Mautaru information house (Chief Lauman). Mamas would like 2 parking areas one at both ends of the village.
- On southern side of road a coconut tree that needs to be removed (Betty Noal owner has approved this).
- Betty's house is the closest house to the road in the village. There is still at least 8m from the edge of the road to her house at the moment, she is happy for the road to move closer to her house.
- A SW pipe on the southern edge of the road was broken by PWD during some maintenance works, since then there has been localised flooding on the southern side of the road.

- Alignment shifted landward with rebuilding of bridge (approximately 300m?? of existing road affected by alignment shift)
- Existing alignment sealed as is at current width
- Existing alignment sealed with expanded width (where possible with regard to stalls).

## **Consultation and Village Welkam Meeting – Gideon’s Landing 10am Wednesday 17<sup>th</sup> September 2008**

Men: 29

Women: 2

Villages – Awak, Ftalema, Mangaliliu, Mangas, Fatkao, Fatlanlangi and Fatanrana.

- Phillippe Firiam (ESU)
- Craig Smart (Downer EDI)
- Williamson Moli (MCC-Vanuatu)
- Mandy Fitchett (ESA Consultant)
- Stanley John (SHEFA)
- Chief Mormor (Vaturisu Council of Chiefs)
- Tony Sewen
- Chris Cookson (MCC)

### Meeting Notes

- Tanoliu tourism precinct, lack of policy from SHEFA.
- General Tanoliu issues from ‘Chief’ who did not attend the Tanoliu meetings
- Lelepa landing –
  - Access to their boat landing area, use frequently during the day
  - Machines moving up and down the road may affect the stability of the bank near their boat landing
  - Silt control for runoff from the road to the coast.
  - big culvert close to the sea may need special attention.
- Chief Batok from Lelepa is concerned about those walking to Vila regularly, safety for pedestrians needs to be considered.
- What happens to fences and trees that are going to be removed, how will this work.
- John Kalori asked whether the road to Mangaliliu will be tar sealed.
- What are the pegs on the side of the road for?
- Concern about objects of archeological significance to be protected during works.
- Is there are a Government law about the RoW if so then everyone must abide by this and move their fences back.
- UNELCO has power poles in the RoW so should have to move them out of Government RoW. They should be treated the same as the landowners with fences in the RoW.
- Concerns again about access for Lelepa Island people to their boats from the road.

## Consultation and Village Welkam Meeting – Emua 2pm 18<sup>th</sup> September 2008

Men: 71

Women: 20

Villages – Siviri, Saama, Emau and Takara

- Phillippe Firiam (ESU)
- Craig Smart (Downer EDI)
- Williamson Moli (MCC-Vanuatu)
- Mandy Fitchett (ESA Consultant)
- Stanley John (SHEFA)
- Chief Mormor (Vaturisu Council of Chiefs)
- Tony Sewen
- Chris Cookson (MCC)

Meeting Notes:

- Chief Kalmari (Counsellor for North Efate) asked about job application process firstly he wanted to know if he could photo-copy the forms, secondly he queried whether the quarry fees were being established for landowner or was the use of the quarry free for the Government. Thirdly he wanted to know what would happen to the fences (especially bullock fences) and fruit plants located next to the road. Who pays?
- Someone was selling the job application forms so Tony responded with an explanation of the process.
- Mark spoke about the compact goal to reduce poverty, suggesting best way to do this was to employ youth from their villages to work on the road.
- Mamas are concerned about road safety after the road is complete, especially for children playing and walking to school, what is the plan for safety management? Many drivers just ignore signs so what else can you do?
- What happens during construction if there is marriage or a funeral in the village and there are lots of cars coming to the village. Craig responded by requesting that communities give Downer as much notice as possible and they will accommodate the village events with extra traffic flows into their traffic management plan.
- Question about the trench depth for telephone wires, water pipes across the road. Also how can the contractors and new road deal with flooding. Craig explained that culverts and drainage pipes will prevent some water for pooling on road but will not stop flooding from very big rain events.
- Concern about Downer breaking a water pipe and cable that AusAid paid for. Downer responded that if the contractor breaks it or anything then the contractor will fix it. Grievance procedures were explained to community at this point. Fence on the road edge being damaged and not replaced used as example.
- Keeping pipes and drains clear of material is part of keeping road functioning.
- Question about what will happen to any excess material. Previously PWD provide this to the community to build football field or playing area for children or to level and area. Can Downer do this? Craig responded that they could if circumstances allow it though they must spend there time building the road rather than football fields. Downer have 1065 days to build the road and already started counting.

- Offer from community for Craig and the work crew to stay at his house or with his community. Craig explained they may be setting up a camp for workers to stay in but will not sleep in villages but near their machines.
- Question about where Downer will crush the stones from the quarry. Community wanted it crushed in their quarry, perhaps as relate this process to employment opportunities?
- What is the quality of the road, how is it being designed. Craig responded that has a 20- 25 year life depending on how it is maintained, explained thickness of tar seal. Also that the PWD budget increased 100% as part of the compact to ensure maintenance is better. The life of the road is also related to the drainage so important to maintain this too.
- How many quarries in North Efate? At this stage not all licenses have been confirmed but the contractor need quite a few.
- Question on what maintenance is required for a tar seal road. Craig explained PWD community contracts scheme, though this needs to be developed further.

## Epau Village Consultation and Kastom Welkam

25 September 2008 10am in Epau Village

### Attendees

Male - 51

Female - 9

### Background

From Takara Village to Pangpang is land kastom owned by Epau. Villages of Epule, Ekipe and smaller settlements are people from Tongva and Tongariki Island living on Epau peoples land.

### Meeting Notes

Chief Baglau has started Committee for the matters related to the Road with Chiefs from the other surrounding villages. This committee has been formalised by the Government. (Potential Consultation meeting). Vice President of Committee is Morris. This Committee would like more information from the Government about the road.

Compensation for fruit trees should be more than seedling as seedlings take a long time to grow. Not a fair approach as decided by all members of the committee.

Moli explained the Grievance Procedure in response. Concerns of the seedlings may be directed to Department of Agriculture.

The Director of PWD has talked to the Committee and said that there would be compensation for the fruit crops, villages want to know who to believe.

What about fences and houses in RoW, what is happening to them?

Water supply system in Epau crosses the road. What is the procedure for protecting this and repairing it if damaged during construction. Who is responsible, the road builders, PWD or the community?

The RoW belongs to the Government, however this land was taken without consultation. Recent public announcement is that anything planted in the ROW from last weekend will not be compensated.

Kalpie Joseph brought up the land summit which was held to take 15m RoW but did not consult Epau.

Community believes they need consultation for the fruit trees, want to know what UNELCO get for moving their power poles.

Land Reform Act explained by Catherine.

For 2km section of road the water pipe is close to the road Ben Gari (plumber) to show Craig where it is.

Population of Epau is 700 so there is also a need for road safety measures including traffic speed humps and signs/

Jimmy Thomas from Maturisu has a fence close to the road and wants to know what surveying has been done to establish what fences should be relocated.

Tora – requested that a road is built up into the bush to improve access to their gardens.

Question about the quarry development, are the kstom owners going to get any money or is it going to the middle men.

Donald, wants to know will the Agriculture Department save up enough money to compensate the gardeners with plantations in the RoW in 2 years, if they have no money now they can save the money. There have already been 2 years passed for the project they could have saved the money for compensation in that time.

Farni asked what is the process if someone dies during the road construction works. Employment opportunities. Craig explained it relates to skill level.

US Government are doing there part and paying for the road the Government of Vanuatu should do their part and compensate for the plants.

Japanese Road compensation paid?

Question about procedure if a truck is burnt down, do they stop work or continue?

Chief again questioned the PWD Directors comments about compensation for Fruit trees.

Epau Village is glad the road is being built and believe that we are creating goodwill by bringing a mat however they are concerned about the loss of fruit crops. They just want to share their concerns they are not going to block the road just need to be sure we consider the impact on the community.

Chief from Epau was not at the Vaturisu meeting that Chief Mormor referred to in his speech where chiefs agreed to help out and give as much as possible to the road progress.

Flood and drainage issues need to be carefully considered, sections of the road from Epule to Epau flood, again Craig to meet with Ben (plumber) to discuss these issues.

13. After meeting spoke to Assistant Chief and 6 older men about the significance and any value of the coral rock that is at the pinch point before the village at 77.9km. The men agreed that the rock had no value and could be removed. They also agreed that the Christmas trees through the village could be removed and had no significance to the village. The community of Wallis living adjacent to Manuro Shores subdivision do not have a water supply across the road.
14. Signatures gained from 2 land owners with potentially affected fences.

## Village Consultation and Kastom Welkam in Eton – 10am 3<sup>rd</sup> October 2008 @ Eton Village

Women - 7

Men - 13

- Catherine Malosou (MCA)
- Chief Mormor (Vaturisu Council of Chiefs)
- Phillippe Firiam (ESU)
- Craig Smart (Downer EDI)
- Williamson Moli (MCC-Vanuatu)
- Mandy Fitchett (ESA Consultant)
- Stanley John (SHEFA)

### Meeting Notes

- Chief is in Port Vila, leaves every morning around 7am. Assistant Chief is present.
- Catherine delivers GET at a more detailed and focused level as inventory of losses for this section has been completed.
- Ben Kalous asked about traffic safety now that cars will travel faster. Who will maintain the new road and who will remove the coconuts and bananas within the RoW.
- Craig responded to safety concerns with speed bumps, signage and narrower road through the village. Phillippe responded to question about maintenance and PWD community contracts. Catherine advised that Eton community does not have any bananas in RoW, some coconuts that will be managed under the GET.
- Community reported that PWD had told them a while back not to plant anything in the RoW, some thought it was 15m, and one elder thought it was 100m.
- Elder asked why we care about the coconut and banana trees in the RoW. Moli explained that the world is changing and we must consider our environment more.
- Water pipes under the road will be protected. Timothy Ari has all the information Downer need on water pipes under the road.
- No telephone wired under the road.
- Village has speed bumps, who will replace them.
- Employment, when will they ant workers and what is the best way to get a job working on the road.
- Eton village believe the road is very good thing and congratulated the tem on its good process of talking and considering their property.

**Leaseholders Consultation Meeting Efate Ring Road 1.30pm 27<sup>th</sup> October 2008 PWD  
Conference Room, Port Vila**

Russell Nari (DG of MoL)  
Chuck Sethness (MCC)  
Chris Cookson (MCC)  
Craig Smart (Downer EDI)  
Phillippe Firiam (PWD)  
Ambatha  
Dennis (PWD)  
Catherine Malesou  
Mandy Fitchett  
Tony Sewen (MCA Acting Director)

5 leaseholders in attendance

Meeting Notes

- Explanation of RoW now 15m, previously 20m, change occurred in 1997. Leaseholder asked why the change and who manages the balance of land. Russell did not know why they changed this and that yes the balance of land would become no-mans land where there is a lease to 20m RoW and Govt now will only maintain 15 RoW as would be to difficult to extend the lease.
- Craig delivered information on timing of road construction, designs, and move ahead to Meten Hill. Clarified that 2 teams would be developed one to work east and the other west from Meten Hill.
- May 2010 to finish the road, with most construction occurring next March dry season.
- David Russet offered the use of leaseholders land for stockpiling of vegetation cleared from the road side. They will just let it rot own. Downer would like quite a few so they don't have to drive too far from each one.
- Prefer to use hollows close to the road, some people have requested they get their holes filled but all stockpiles must be approved by the Engineer at MCA to prevent siltation if in a flooding area
- Downer is open to applications to put waste to fill holes.
- Outlet drains on leaseholders land may also be necessary so Downer will talk to the landowners leaseholders about this when the final designs come through.
- Justin Smith – there is water pipe buried 10-12 inches below surface for Siviri Village water supply. Undine Bay has a water pipe buried under the road b the front gate

## Epau Community Consultation – RAP related issues

7.30am Monday 3<sup>rd</sup> November

Epau Community Whare, followed by village walk and site visit along the length of the road where the community have gardens.

- Catherine Malesou
- Craig Smart
- Mandy Fitchett

### Meeting Notes

- Chief Falawea already in Vila so not in attendance. Small Chief and Assistant Chiefs present at meeting
- Catherine explained purpose of the meeting and that Moli, Chief Mormor, Frederick Kai and Mandy identified as many property (crops and structures) owners as possible but would appreciate assistance with owners list.
- Craig advised community that for anything they want replanted or harvest that this must be done by June 2009 as Downer plans to clear the RoW then.
- PWD will clear and RoW and help move fence back.
- This process is much better than the current PWD process, which is just 1 month notice, the community have 8 months for removing and replanting, harvesting crops.
- Chief (Abel Kai) requests financial compensation, understands that MCA do not have money but believes that it is the Governments responsibility as the Director of PWD told the community representatives that they were getting money a compensation.
- Pastor got up and responded to say that he does not want us to think that Epau community have 'black hearts' or a re negative about the road, but rather they are desperate for it, and will help and support MCA in the development of the road.
- Community would prefer that the names for each crop is the individual rather that Chief or family name.
- Walked through the village from the Epau bridge (Kai Family land) through the entire village to the Mango trees owned by Max Kai. During the walk the Chief (Abel) identified locations for speed umps (identified 9 speed humps in total).
- Drove with land and property owners the rest of Epau land to gain list of owners to collect signatures.
- Community made decisions about where the road should go through their village and identified where crops must be designed around. Talked to all landowners regarding the GET and agreement where there were losses. All previous problems with the community seemed to be cleared up once they saw the impact on the community.
- Seedlings replaced by Department of Agriculture, land cleared Feb or March next year for 2 landowners, Tony Jack and Obed Douglas.
